Profile

Backend Developer with 2+ years of experience building scalable RESTful APIs, ERP systems, healthcare platforms, and marketplace/e-commerce solutions using Laravel and Node.js. Experienced in HIPAA-compliant systems, AWS integrations, Stripe and Stripe Tax, MongoDB, PostgreSQL, MySQL, API security, and production support. Strong in secure backend development, third-party integrations, database optimization, and maintainable feature delivery.

Skills

Backend: PHP, JavaScript, Laravel, Node.js, Express.js, NestJS, RESTful APIs, Eloquent ORM

Databases: MySQL, PostgreSQL, MongoDB, SQL Server, Database Design, Query Optimization, Performance Tuning

Cloud & DevOps: AWS S3, AWS SNS, Docker, cPanel, Git, GitHub

Integrations: Stripe, Stripe Tax, Payment Gateways, SMS, Email Notifications, Third-Party APIs

Security & Compliance: HIPAA-Compliant Systems, JWT, OAuth 2.0, API Rate Limiting, PII/PHI Data Handling

Architecture: OOP, SOLID, MVC, Repository Pattern, Microservices, ERP Systems, Multi-Portal Platforms

Frontend: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Blade, Vue.js (basic)

Experience

Backend Developer - Orthoplex Solutions

Jan 2026 - Present | Hybrid | Software House serving Canadian healthcare and business platforms

- Develop and maintain backend features across multiple Canadian healthcare, privacy, ERP, marketplace, and e-commerce platforms using Laravel, Node.js, Express.js, NestJS, MySQL, PostgreSQL, MongoDB, and AWS.
- Contribute to HIPAA-compliant healthcare systems including TapType, a medical ERP/workflow platform supporting secure clinical operations and patient-related workflows.
- Build secure APIs and integrations including Stripe, Stripe Tax, AWS S3, AWS SNS, payment flows, notifications, and external service APIs.
- Work on PII Safe, a HIPAA-compliant microservice for securing sensitive data and enabling other systems to integrate with it through secure APIs.
- Develop backend functionality for Mobilizerz, a Canadian multi-portal marketplace platform with customer, vendor, and admin portals.
- Maintain production systems by fixing bugs, optimizing SQL/Eloquent logic, improving performance, and delivering new features based on business requirements.

Full Stack Developer - EEC Group

Jan 2025 - Jan 2026 | Onsite | Egypt

- Developed and maintained a large-scale ERP system using Laravel for HR, payroll, attendance, approval workflows, and internal business operations.
- Provided production support and bug fixing for live issues, improving reliability for 1000+ active users.
- Wrote and optimized complex SQL queries and Laravel Eloquent logic to improve performance and data accuracy.

Full Stack Developer - The Tailors Dev Company

Jan 2024 - Jan 2025 | Hybrid | Egypt

- Built and deployed e-commerce backend services using Laravel and MySQL, including core business workflows and admin functionality.
- Designed secure authentication using Laravel Sanctum and JWT, and developed RESTful APIs for mobile app consumption.
- Developed backend and frontend components using Laravel and Blade; integrated SMS, payment gateways, and email notifications.

Education

Bachelor's Degree - Management Information Systems | El-Shourok Academy, Egypt | 2019 - 2023
